

Critical Care Medicine Blueprint

Certification Examination (CERT)

Purpose of the exam

The exam is designed to evaluate the knowledge, diagnostic reasoning, and clinical judgment skills expected of the certified critical care medicine specialist in the broad domain of the discipline. The ability to make appropriate diagnostic and management decisions that have important consequences for patients will be assessed. The exam may require recognition of common as well as rare clinical problems for which patients may consult a certified critical care medicine specialist.

Exam content

Exam content is determined by a pre-established blueprint, or table of specifications. The blueprint is developed by the ABIM and is reviewed annually and updated as needed for currency. Trainees, training program directors, and certified practitioners in the discipline are surveyed periodically to provide feedback and inform the blueprinting process.

The primary medical content categories of the blueprint are shown below, with the percentage assigned to each for a typical exam:

Medical Content Category	% of Exam
Renal, Endocrine, and Metabolic Disorders	15.0%
Cardiovascular Disorders	17.5%
Pulmonary Disease	20.0%
Infectious Disease	12.0%
Gastrointestinal Disorders	5.0%
Neurologic Disorders	9.5%
Hematologic and Oncologic Disorders	5.5%
Surgery, Trauma, and Transplantation	7.0%
Pharmacology and Toxicology	4.5%
Research, Administration, and Ethics	2.0%
Critical Care Ultrasound Scanning	2.0%
	100%

Exam questions in the content areas above may also address clinical topics in general internal medicine that are relevant to the practice of critical care medicine (including some general pediatrics with an emphasis on adolescent medicine).

ABIM is committed to working toward health equity and believes that board-certified physicians should have an understanding of health care disparities. Therefore, health equity content that is clinically important to each discipline will be included in assessments, and the use of gender, race, and ethnicity identifiers will be re-evaluated.

Exam format

The exam is composed of up to 240 single-best-answer multiple-choice questions, of which approximately 40 are new questions that do not count in the examinee's score. Most questions describe patient scenarios and ask about the work done (that is, tasks performed) by physicians in the course of practice:

- Making a diagnosis
- Ordering and interpreting results of tests
- Recommending treatment or other patient care
- Assessing risk, determining prognosis, and applying principles from epidemiologic studies
- Understanding the underlying pathophysiology of disease and basic science knowledge applicable to patient care

Clinical information presented may include various media illustrating relevant findings, such as diagnostic imaging studies. Some questions require interpretation of pictorial material, such as pressure tracings, ultrasound scans, magnetic resonance imaging scans, electrocardiograms, radiographs, computed tomograms, radionuclide scans, and photomicrographs. [Learn more information on how exams are developed.](#)

A tutorial including examples of ABIM exam question format can be found at <http://www.abim.org/certification/exam-information/critical-care-medicine/exam-tutorial.aspx>.

The blueprint can be expanded for additional detail as shown below. Each of the medical content categories is listed there, and below each major category are the content subsections and specific topics that *may* appear in the exam. Please note: actual exam content may vary.

Renal, Endocrine, and Metabolic Disorders**15%** of Exam**Sodium-water balance**

2%

Hyponatremia

Syndrome of inappropriate antidiuretic hormone secretion

Cerebral salt wasting

Psychogenic polydipsia

Hypothyroidism

Iatrogenic

Exercise-induced

Hypernatremia

Central diabetes insipidus

Nephrogenic diabetes insipidus

Osmotic diuresis

Primary hypodipsia

Dehydration

Gastrointestinal fluid losses

Hypervolemia

Hypovolemia

Potassium disorders

<2%

Hyperkalemia

Pseudohyperkalemia

Drug-induced

Adrenal insufficiency

Hypokalemia

Vomiting

Diarrhea

Renal losses

Drug-induced

Acid-base disorders

4.5%

Metabolic acidosis

Increased anion gap

Lactic acidosis

Ketoacidosis

Hypoalbuminemia

Normal anion gap

Diarrhea

Saline resuscitation-associated

Drug-induced

Decreased anion gap in multiple myeloma

Metabolic alkalosis	
Diuretic-induced (contraction alkalosis)	
Other metabolic alkalosis topics (parenteral ...nutrition–induced, complications of citrate anticoagulation)	
Mixed acid-base disorders	
Respiratory acidosis	
Respiratory alkalosis	
Toxic ingestions	<2%
High osmolar gap	
Ethanol	
Methanol	
Isopropyl alcohol	
Ethylene glycol	
Propylene glycol	
Normal osmolar gap	
Salicylates	
Calcium, phosphate, and magnesium disorders	<2%
Hyperphosphatemia	
Hypophosphatemia	
Hypercalcemia	
Hypocalcemia	
Hypermagnesemia	
Hypomagnesemia	
Hyperammonemia	<2%
Diabetes mellitus (excluding diabetic ketoacidosis) and energy metabolism	<2%
Hyperglycemic hyperosmolar state	
Hyperglycemia	
Hypoglycemia	
Thyroid disorders	<2%
Hypothyroidism	
Hyperthyroidism	
Nonthyroidal illness syndrome	
Parathyroid disorders	<2%
Adrenal disorders	<2%
Adrenal insufficiency	
Relative adrenal insufficiency in critical illness	
Adrenal excess	
Addison Disease	

Pituitary disorders	<2%
Tumor-related syndromes	<2%
Acute kidney injury	2%
Contrast-induced	
Pigment-induced	
Oncology-related	
Pre-renal disease	
Intrinsic disease	
Glomerulonephritis	
Interstitial nephritis	
Rhabdomyolysis	
Acute tubular necrosis	
Renal replacement therapy	

Cardiovascular Disorders	17.5% of Exam
---------------------------------	----------------------

Acute coronary syndromes	<2%
Unstable angina pectoris and non-ST-segment elevation myocardial infarction (NSTEMI)	
Unstable angina pectoris	
NSTEMI	
ST-segment elevation myocardial infarction (STEMI)	
Diagnosis	
Complications	
Heart failure, cardiogenic shock	
Ventricular septal defect	
Acute mitral regurgitation	
Ventricular wall rupture	
Electrical conduction abnormalities	
Right ventricular failure	
Arrhythmias	
Management of STEMI	
Cocaine-related ischemia	
Arrhythmias	<2%
Supraventricular tachycardia	
Atrial fibrillation	
Atrial flutter	
Multifocal atrial tachycardia	
Pre-excitation syndromes	

Paroxysmal supraventricular tachycardia (atrioventricular [AV] nodal reentrant tachycardia)	
Ventricular arrhythmias	
Nonsustained ventricular tachycardia	
Monomorphic ventricular tachycardia	
Polymorphic ventricular tachycardia	
Ventricular fibrillation	
Accelerated idioventricular rhythm	
Long QT syndrome	
Brugada syndrome	
Bradyarrhythmias	
Sinus bradycardia	
Sinoatrial exit block	
Atrioventricular block	
Pacemakers and defibrillators	
Heart failure	3.5%
Heart failure with reduced ejection fraction (HFrEF)	
Heart failure with preserved ejection fraction (HFpEF)	
Hemodynamic monitoring	5.5%
Interpretation of arterial catheterization	
Pulmonary arterial catheterization	
Central venous catheterization	
Non-invasive hemodynamic monitoring	
Vascular disorders	<2%
Aortic dissection and aneurysm	
Aortic dissection	
Aortic aneurysm and transection	
Shock	
Hypertensive emergency and urgency	
Valvular heart disease	<2%
Mitral stenosis	
Aortic stenosis	
Aortic regurgitation	
Mitral regurgitation	
Endocarditis	
Structural defects	
Atrial	
Ventricular	

Pericardial disease	<2%
Pericarditis	
Cardiac tamponade	
Myocardial disease	<2%
Myocarditis	
Hypertrophic cardiomyopathy	
Peripartum cardiomyopathy	
Stress cardiomyopathy	
Mechanical circulatory support	<2%
Intraaortic balloon pump (IABP) counterpulsation	
Extracorporeal membrane oxygenation (ECMO)	
Ventricular assist devices (VADs)	
Transplanted heart	<2%

Pulmonary Disease	20% of Exam
--------------------------	--------------------

Respiratory failure	2%
Hypoxemic	
Hypercapnic	
Mechanical ventilation	6%
Initiation and maintenance of mechanical ventilation	
Endotracheal intubation and tracheostomy	
Modes	
Oxygenation	
Ventilation (CO ₂)	
Waveforms	
Respiratory system compliance (lung mechanics)	
Complications of mechanical ventilation	
Barotrauma	
Bronchopleural fistula	
Ventilator-induced lung injury	
Dynamic hyperinflation (auto-PEEP)	
Intracardiac shunt	
Complications of endotracheal tubes and tracheostomy	
Liberation from mechanical ventilation	
Noninvasive ventilation	
Airway disease	2%
Upper airway disease	
Upper airway obstruction	
Tracheoesophageal fistula	

Intubation-related laryngeal edema	
Anaphylactic airway edema and increased negative inspiratory pressure	
Airway control	
Asthma	
Chronic obstructive pulmonary disease (COPD)	
Parenchymal lung disease	5%
Acute respiratory distress syndrome (ARDS)	
Pneumonia	
Community-acquired pneumonia (CAP)	
Typical bacterial	
Atypical bacterial	
Aspiration	
Viral	
Fungal	
Hospital-acquired pneumonias and immunocompromised hosts	
Ventilator-associated pneumonia (VAP)	
Hematogenous pneumonia	
<i>Aspergillus</i> pneumonia	
Non- <i>Aspergillus</i> pneumonia	
<i>Pneumocystis jirovecii</i> pneumonia	
Viral pneumonia	
Noncardiogenic pulmonary edema	
Neurogenic	
Tocolytic	
Negative-pressure	
High-altitude	
Interstitial lung disease	
Diffuse alveolar hemorrhage	
Atelectasis	
Pulmonary vascular disorders	2%
Pulmonary thromboembolism	
Deep venous thrombosis (DVT)	
Pulmonary embolism (PE)	
Nonthrombotic embolism	
Air	
Tumor	
Septic	

Pulmonary hypertension	
Acute chest syndrome in sickle cell disease	
Pulmonary vasculitis	
Hepatopulmonary syndrome	
Hemoptysis	<2%
Massive	
Submassive	
Pleural disorders	2%
Pleural effusion	
Infectious (empyema)	
Noninfectious	
Pneumothorax	
Hemothorax	

Infectious Disease	12% of Exam
---------------------------	--------------------

Systemic infections	<2%
Sepsis and septic shock	
Bacterial infections (typical and atypical)	
Tuberculosis	
Atypical mycobacterial infections	
Nocardiosis	
Listeriosis	
Brucellosis	
Typhoid fever	
Tularemia	
Plague	
Rickettsial or Rickettsial-like infections	
Rocky Mountain spotted fever	
Ehrlichiosis/Anaplasmosis	
Spirochetal infections	
Lyme disease	
Leptospirosis	
Fungal infections	
Viral infections	
Parasitic diseases	
Malaria	
Babesiosis	
<i>Strongyloides</i> hyperinfection syndrome	
Giardiasis
